HydroFLECTOR™, Kinco®'s signature line of waterproof and water-resistant gloves, ensures your hands remain dry & protected in wet conditions.

aquaHIDE™
WATER-RESISTANT LEATHER

Natural leather infused with a proprietary oil-additive during the tanning process, which ensures the individual leather fibers are uniformly coated, and prevents water penetration.

Heatkeep®
INTERNAL THERMAL LAYER

Comprised of finely spun polyester fibers that create thousands of air pockets to fully envelop the hand, which work to trap the body heat generated inside the glove and shield the hand from the cold.

TR2 INNER LINING

Soft layer of nylon batting & non-absorbent polypropylene laminated to our Heatkeep® thermal lining to wick water away from the hand.

Example cross-section of a lined HydroFlector™ glove using aquaHIDE™

GLOVE 101

NYLON
 Nylon is a synthetic material that's a durable, abrasion resistant, & resilient fiber. In addition to being moisture wicking, it is resistant to insects, fungi, & mildew.

MICRO-FOAM NITRILE
 This synthetic form of latex offers unique flexibility & softness that provides superior dexterity while allowing the hand to breath, keeping it cool & dry for long term use. Maintains a firm grip when dealing with light oils.

FEATURES

- Breathable
- High Dexterity
- Washable
